

penergetic b^{WV}

With the impulse of nature.

Biostimulation with Penergetic products for protection from browsing by game.

The game bite problem is solved organically and sustainably with penergetic b WV. No time-consuming fencing or periodic application is necessary. Penergetic b WV protects arable land and the environment in a sustainable and effective way.

- Protection from game browsing
- Does not require electricity
- Suitable for wild boars
- Long-term effect even after precipitation
- Odourless

* Approved for use in organic agriculture in Switzerland according to the FIBL inputs list.

for farmland

...for intelligent agriculture

Application

Penergetic b WV is applied as a soil application. It is sprayed after seeding. Penergetic b WV can be mixed with spray agents or liquid manure.

The game deterrent product can be combined with penergetic b (soil quality) and penergetic p (plant strengthening)*.
